

UPC/EAN Barcodes Test

This is an assortment of barcodes from various items I found at home. A stylesheet produces a bar pattern from a string of digits. The last digit on the generated pattern (check digit) is calculated by the stylesheet; it must coincide with the digit found on the original item label, written on the right.

 9 780444 505156	<p>Argument string: 978 0-444-50515 Check digit should be 6</p> <p>Proceedings of the WWW9 Conference, Amsterdam (EAN 13)</p>
