

## Graphics - Inline Images

This is the image that will be used for the test:  must be aligned so that the bottom edge of the image coincide with the baseline of the text. The next occurrence

[  ] differs in two aspects: first, it is scaled to one-half of the original size; second, it

is aligned to the **vertical-align="middle"** of the corresponding line. The third occurrence

[  ] is scaled by explicitly setting its width and height to 24 pt. The vertical alignment

is vertical-align="top".
